Projects

06/2024 – present

TechNow, *React.js, Node.js, Express.js, MongoDB, API Integration, Typescript, HTML, CSS* 🔗
Tech Now is a dynamic web application designed to streamline the workflow for technicians. The app allows technicians to receive, manage, and update work order requests efficiently. It provides a platform for technicians to keep track of their tasks, communicate with clients, and ensure timely completion of services.

06/2024 – present

Convertio, *Tech Stack: React.js, Node.js, Express.js, MongoDB, API Integration, JavaScript, HTML, CSS* 🔗
Convertio is a powerful and versatile conversion tool designed to handle a wide range of file formats. It provides users with the ability to convert documents, media files, images, and more with ease and efficiency. The app ensures high-quality output and supports various conversion options to meet diverse user needs.

08/2023 – present

U-first, *Tech Stack: React.js, Node.js, Express.js, MongoDB, API Integration, JavaScript, HTML, CSS* 🔗
U-First is a web application designed to provide residents with a comprehensive range of home services. The platform allows users to easily book and manage services such as HVAC, Plumbing, Electrical, and Painting, ensuring a convenient and efficient experience for homeowners.

Professional Experience

08/2020 – present
fayetteville, United States

Fullstack Developer, *U-First* 🔗
At U-First, I played a key role in developing a comprehensive web application that streamlines the booking and management of HVAC, Plumbing, Electrical, and Painting services. Utilizing my full-stack development skills, I created a user-friendly platform that enhances customer experience and operational efficiency. The application leverages modern web technologies to provide a seamless and responsive interface for users.

05/2023 – present
United States

Fullstack Developer, *TechNow* 🔗
As a Full Stack Developer for Tech Now, I was responsible for designing and developing a comprehensive technician management application. The Tech Now app enables technicians to receive, manage, and update work order requests efficiently. The application includes features for task tracking, client communication, and team collaboration, providing an all-in-one solution for managing field services.
